

GD150 Oil Free Compressor

The GD150 is a high flow, oil free, radial vane compressor for pressure off-loading of bulk liquids. The most modern materials and manufacturing methods make the GD150 compressor the most reliable and durable vane compressor available.

Features

- 100% oil free air for clean product unloading
- Corrosion resistant, stainless steel rotor will not corrode or de-plate like coated rotors
- Steel shafts for durability and strength
- Viton® seals
- High temperature blades
- Lightweight and compact with anodized aluminium body and side plates
- Double ended shaft for clockwise or counter clockwise drive
- Hydraulic drive mounting trunks available for direct coupling of hydraulic motors

GD150 Oil Free Compressor

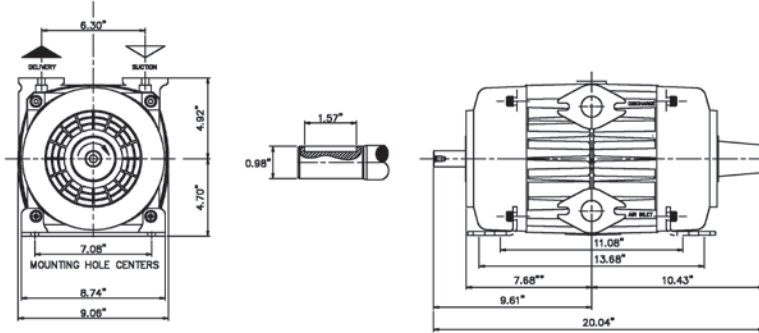

- Pressure to 36 psig
- Flow rate to 75 cfm
